Preface *vii*

Acknowledgements *ix*

1. NUMERICAL DESCRIPTIVE MEASURES 1–35

1.1 Introduction *1*

1.1.1 Population and Sample *2*

1.1.2 Types of Variables *2*

1.1.3 Organising Data *3*

1.1.3.1 Qualitative Data *4*

1.1.3.2 Graphical Representation of Qualitative Data *4*

1.1.3.3 Graphical Representation of Quantitative Data *5*

1.2 Numerical Summary Measures *9*

1.2.1 Measures of Central Tendency for Ungrouped Data *9*

1.2.1.1 Mean for Ungrouped Data *10*

1.2.1.2 Median *10*

1.2.1.3 Mode *10*

1.2.1.4 Empirical Relation among Mean, Median and Mode *10*

1.2.2 Measures of Dispersion for Ungrouped Data *12*

1.2.2.1 Range *12*

1.2.2.2 Variance and Standard Deviation *12*

1.2.3 Mean, Variance and Standard Deviation for Grouped Data *14*

1.2.3.1 Mean for Grouped Data *14*

1.2.3.2 Variance and Standard Deviation for Grouped Data *14*

1.2.4 Measures of Position *15*

1.2.4.1 Quartiles and Interquartile Range *16*

1.2.4.2 Percentiles *17*

1.2.4.3 Skewness and Kurtosis *18*
1.2.4.4 Box-and-Whisker Plot *19*
1.3 Summary *21*
Problems *22*
Review Questions *31*
State True or False *32*
Answers to State True or False *35*

2. PROBABILITY **36–78**

2.1 Experiment, Outcome and Sample Space *36*
2.2 Simple and Composite Events *37*
2.3 Axioms of Probability *38*
2.4 Finite Probability Spaces *38*
2.5 Infinite Probability Spaces *39*
2.6 Properties of Probability *40*
2.7 Venn Diagram *40*
2.8 Probability Tree or Tree Diagram *41*
2.9 Approaches to Probability *44*
2.9.1 Classical Probability *45*
2.9.2 Relative Frequency Concept of Probability *45*
2.9.3 Subjective Probability *45*
2.9.4 Marginal Probability *45*
2.9.5 Conditional Probability *45*
2.10 Mutually Exclusive Events *47*
2.11 Independent and Dependent Events *48*
2.12 Complementary Events *48*
2.13 Intersection of Events and Multiplication Rule *51*
2.13.1 Intersection of Events *51*
2.13.2 Multiplication Rule *51*
2.14 Union of Events and the Addition Rule *55*
2.14.1 Union of Events *55*
2.14.2 Addition Rule *55*
2.15 Baye's Formula *58*
2.16 Additional Examples and Solutions *61*
2.17 Summary *67*
Problems *67*
Review Questions *76*
State True or False *77*
Answers to State True or False *78*

3. RANDOM VARIABLES AND PROBABILITY DISTRIBUTIONS 79–173

3.1 Random Variables *79*
- 3.1.1 Discrete Random Variables *80*
- 3.1.2 Mean and Standard Deviation of a Discrete Random Variable *82*
- 3.1.3 Continuous Random Variables *90*
- 3.1.4 Mean and Variance for Continuous Random Variables *91*
- 3.1.5 Expectation *92*

3.2 Permutations and Combinations *98*
- 3.2.1 Permutations *99*
- 3.2.2 Combinations *101*

3.3 Discrete Distributions *103*
- 3.3.1 Hypergeometric Distribution *103*
- 3.3.2 The Binomial Probability Distribution *108*
- 3.3.3 The Binomial Experiment *108*
- 3.3.4 The Binomial Formula *108*
  - 3.3.4.1 Binomial Theorem *108*
  - 3.3.4.2 Cumulative Terms for Binomial Distribution *109*
  - 3.3.4.3 Mean and Standard Deviation of Binomial Distribution *110*
- 3.3.5 Poisson Distribution *118*
  - 3.3.5.1 Derivation from Binomial Distribution *120*
  - 3.3.5.2 Mean and Standard Deviation *120*

3.4 Continuous Probability Distributions *127*
- 3.4.1 The Normal Distribution *127*
  - 3.4.1.1 Properties of the Normal Distribution *129*
  - 3.4.1.2 Mean and Variance of the Normal Distribution *129*
  - 3.4.1.3 The Cumulative Normal Distribution *130*
  - 3.4.1.4 The Standard Normal Distribution *130*
  - 3.4.1.5 Problem-Solving Procedure *132*

3.5 Approximating Probability Distributions *145*
- 3.5.1 Binomial Approximation to the Hypergeometric *145*
- 3.5.2 Poisson Approximation to the Binomial *145*
- 3.5.3 Normal Approximation to the Binomial *146*
- 3.5.4 Normal Approximation to the Poisson *147*

3.6 Chebyshev's Theorem *152*

3.7 Empirical Rule *156*

3.8 The Central Limit Theorem *157*

Problems 159

Review Questions 170

State True or False 171

Answers to State True or False 173

4. SAMPLING DISTRIBUTIONS 174–203

4.1 Properties of Sample Mean and Variance *175*
4.2 Population and Sampling Distributions *176*
4.2.1 Population Distribution *176*
4.2.2 Sampling Distribution *176*
4.3 Sampling and Nonsampling Errors *177*
4.4 Mean and Standard Deviation of x *178*
4.5 Shape of the Sampling Distribution of $\bar{x}$ *182*
4.5.1 Sampling from a Normally Distributed Population *182*
4.5.2 Sampling from a Population that is not Normally Distributed *184*
4.6 Applications of the Sampling Distribution of $\bar{x}$ *184*
4.7 Population and Sample Proportions *185*
4.8 Sampling Distribution of $\hat{p}$ *186*
4.9 Mean and Standard Deviation of $\hat{p}$ *186*
4.10 The Chi-square Distribution *189*
4.11 The *t*-Distribution *192*
4.12 The *F*-Distribution *194*
4.13 Summary *197*
Problems *198*
Review Questions *201*
State True or False *202*
Answers to State True or False *203*

5. ESTIMATION 204–256

5.1 Point Estimation *204*
5.2 Interval Estimation *205*
5.3 Confidence Interval on Mean, Variance Known *207*
5.4 Confidence Interval on the Mean of a Normal Distribution, Variance Unknown *214*
5.5 Confidence Interval on the Variance of a Normal Distribution *218*
5.6 Confidence Interval on a Population Proportion *220*
5.7 Confidence Interval on the Difference in Two Means, Variance Known *224*
5.8 Confidence Interval on the Difference in Means of Two Normal Distributions, Variances Unknown *226*
5.9 Confidence Interval on $\mu_1 - \mu_2$ for Paired Observations *233*
5.10 Confidence Interval on the Ratio of Variance of Two Normal Distributions *236*
5.11 Confidence Interval on the Difference in Two Proportions *239*
5.12 Sample Size Selection *244*
5.12.1 Sample Size Selection for Estimating Population Mean *244*
5.12.2 Sample Size for the Estimation of Proportion *245*

5.13 Summary *246*
Problems *246*
Review Questions *255*
State True or False *255*
Answers to State True or False *256*

6. HYPOTHESIS TESTING 257–323

6.1 Null Hypothesis and Alternative Hypothesis *257*
6.2 The Critical Region *259*
6.3 Types of Sampling Error (Type I and Type II Errors) *259*
6.4 Level of Significance *260*
6.5 Tails of a Test *261*
6.6 Hypothesis Test on the Population Mean, Standard Deviation Known *262*
6.7 Hypothesis Test on the Population Mean, Standard Deviation Unknown *267*
6.8 Hypothesis Test for a Population Variance *272*
6.9 Hypothesis Test on a Population Proportion *276*
6.10 Hypothesis Test on Equality of Two Means, Variances Known *280*
6.11 Hypothesis Test on the Means of Two Normal Distributions, Variances Unknown *285*
6.11.1 Case 1: $\sigma_1^2 = \sigma_2^2 = \sigma^2$ *285*
6.11.2 Case 2: $\sigma_1^2 \neq \sigma_2^2$ *290*
6.12 Hypothesis Test to Compare Two Population Means (Paired *t*-test) *295*
6.13 Hypothesis Test on the Equality of Two Variances *300*
6.14 Hypothesis Test on Two Proportions *305*
6.15 Summary *312*
Problems *313*
Review Questions *320*
State True or False *321*
Answers to State True or False *323*

7. CURVE FITTING , REGRESSION AND CORRELATION 324–380

7.1 Linear Equation *325*
7.2 Curve Fitting with a Linear Equation *326*
7.3 Criteria for a "Best" Fit *328*
7.4 Linear Least-Squares Regression *329*
7.5 Linear Regression Analysis *331*
7.6 Interpretation of *a* and *b* *334*
7.7 Standard Deviation of Random Errors *335*
7.8 Coefficient of Determination *335*
7.9 Sampling Distribution of *b* *337*
7.10 Hypothesis Testing about *B* *339*
7.11 Linear Correlation *340*

7.12 Estimating the Mean Value of y *344*
7.13 Estimating a Particular Value of y *345*
7.14 Linearization of Nonlinear Relationships *347*
7.15 Polynomial Regression *350*
7.16 Quantification of Error of Linear Regression *353*
7.17 Multiple Linear Regression *355*
7.18 Weighted Least-Squares Method *357*
7.19 Orthogonal Polynomials and Least Squares Approximation *358*
7.20 Least-Squares Method for Continuous Data *358*
7.21 Approximation using Orthogonal Polynomials *359*
7.22 Gram-Schmidt Orthogonalization Process *361*
7.23 Additional Example Problems and Solutions *362*
7.24 Summary *367*
Problems 367
Review Questions 377
State True or False 379
Answers to State True or False 380

8. CHI-SQUARE TESTS 381–400

8.1 Introduction *381*
8.2 A Goodness-of-Fit Test *381*
8.3 Contingency Table *385*
8.4 A Test of Independence or Homogeneity *385*
8.5 Inferences about the Population Variance *391*
8.6 Estimation of the Population Variance *391*
8.7 Hypothesis Tests about the Population Variance *393*
Problems 395
Review Questions 399
State True or False 400
Answers to State True or False 400

9. ANALYSIS OF VARIANCE 401–411

9.1 Introduction *401*
9.2 One-way Analysis of Variance *401*
9.3 Test Statistic *402*
9.4 One-way ANOVA Test *404*
Problems 407
Review Questions 409
State True or False 410
Answers to State True or False 411

APPENDICES **412–442**

Appendix–A Values for *n* Factorial *412*
Appendix–B Binomial Coefficients *413*
Appendix–C Table of Binomial Probabilities *414*
Appendix–D Cumulative Poisson Distributions *422*
Appendix–E Cumulative Standard Normal Distribution *428*
Appendix–F chi-square Distribution Table *430*
Appendix–G The *t*-Distribution Table *431*
Appendix–H The *F*-Distribution Table *434*
Appendix–I Cramer's Rule *439*

BIBLIOGRAPHY **443–445**

GLOSSARY OF TECHNICAL TERMS **446–460**

GLOSSARY OF SYMBOLS **461–464**

KEY FORMULAE **465–477**

ANSWERS TO SELECTED PROBLEMS **478–513**
