

## OUTLINE for “Distance Learning”

**Thesis Statement:** Despite the argument that distance education should be more widely practiced, traditional educations ought to be preferred since it does not improve education, it causes immobilization of people, it leads to lack of social interactions, and it induces iniquitous time management.

- I. It is claimed that distance education must be more unrestricted to enhance level of education; however, it does not allow the active learning.
  - A. Improve education level
    1. Easy to reach the information
    2. Opportunity for one who is not able to enroll in a school
  - B. Decrease the quality of education
    1. No one to encourage learners
    2. Online learning is not as effective as traditional learning (Mrs. Jennifer and Karen, 2003)
- II. Another argument in favor of distance learning is the claim that students and instructors save their time and; yet, it causes immobilization of people and lack of social interactions.
  - A. Saving time and Money
    1. the traffic is reduced and transportation expenses are declined
      - because they do not need to come to school
    2. traditional courses taking more time (Mr. Bishop, 2010)
  - B. immobilization and lack of social interactions.
    1. Become addicted to computers
    2. less people they meet
- III. It is also argued that distance learning is beneficial because of its comfort, but it does not let use time fertile.
  - A. More convenient
    1. study where they are at ease.
    2. execute their own calendar
  - B. No available time
    1. there never is a convenient time because of everything else going on in their lives (Anonymous, 2014)
